How to Stay in Lockstep with the IRS "Security Six"

As a business owner, you've probably been faced with the question: How can I keep the comfort of the product I currently use while also evolving my business securely?

We've Got The Answers!

By using Intuit Hosting for Lacerte and ProSeries you can easily get the enterprise-level security and data-loss prevention you need, while still keeping the same experience you've come to know and trust.

The IRS "Security Six"

The IRS "Security Six" informs the comprehensive security strategy that we use to keep your client's personal information secure in our hosting environment. Here's a deeper dive into how we approach these tactics so you can have peace of mind.

01 Anti-Virus Software

In partnership with Right Networks, we have a team of security professionals constantly monitoring external threats, scanning data that enters the environment, and vetting every potentially hosted application for vulnerabilities and compatibility.

02 Firewalls

We offer advanced firewalls and intrusion protection that include multiple levels and layers of protection and detection to ensure content integrity.

03 Two-Factor Authentication

We use the leading multi-factor authentication program in the security industry – further protecting crucial data by adding an extra level of security to verify genuine users.

04 Backup Software Services

Your data is backed up nightly and stored in a secure environment for a minimum of 90 days.

05 Drive Encryption

We support data encryption and permission-based access to data with every subscription.

06 Virtual Private Network (VPN)

The ability to connect from any device – no matter the location – through multiple layers of security makes our hosted environment a safer space to store your sensitive data.

So What's Next?

Add Intuit Hosting for Lacerte and ProSeries and move your sensitive data to the cloud. By doing that you are taking the crucial step to protecting your firm while also evolving your business to the next level.
