

How Intuit And Ignition Are Streamlining Proposal to Payment

By: Brady Suggs

Intuit's Integration with Ignition (formerly Practice Ignition) helps tax pros streamline their process from proposal to payment. With integrations with Intuit Practice Management and QuickBooks, tax pros are able to manage all their proposals and payments in one place.

Key capabilities include:

01

Impressive Custom Proposals

Win and retain clients with digital proposals you can quickly prepare and send – and your clients can easily sign on the go.

02

Automated payment collection

Take the hassle out of getting paid by automatically collecting payments or making it easy for clients to review and pay online.

03

Standardized engagement terms

Reduce your business risk by using legally vetted engagement terms that can be customized to the client, service offering and payment.

04

Integrations

QuickBooks and Intuit Practice Management integrations help you centralize your contacts and automate set up tasks and recurring invoicing and billing.

As firms are evolving the technology they use and services they offer, Ignition and Intuit are providing tools to help you manage your firm's work as well as client engagements.
